Office Action Summary	Application No. 10/701,942	Applicant(s) MEHTA ET AL.	
	Examiner SHAIENDRA - KUMAR	Art Unit 1621	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 November 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-8 is/are pending in the application.

DETAILED ACTION

Claims 1-8 are pending in this application.

Priority

1. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in India on 10/31/2003. It is noted, however, that applicant has not filed a certified copy of the Indian application as required by 35 U.S.C. 119(b).

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 8/2/04 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 7-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

These claims depict chlorohydrin as formula (5), however, there is no formula (5) found anywhere in claim 1, thus rendering these claims indefinite.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 1621

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148

USPQ 459 (1966), that are applied for establishing a background for determining

obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

8. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 04-198175 or JP 01-10272.

Instant claims are directed to a process of making atenolol, by reacting a phenol with epichlorohydrin in the presence of alkali metal hydroxide and a quaternary ammonium salt as phase transfer catalyst, wherein an intermediate glycidyl ether is formed, which is then reacted with isopropylamine to give atenolol.

JP'175 or JP'272 teach a process of making atenolol, by reacting a phenol with epichlorohydrin in the presence of alkali metal hydroxide and a quaternary ammonium salt as phase transfer catalyst, wherein an intermediate glycidyl ether is formed, which is then reacted with isopropylamine to give atenolol, see English abstract of both the documents. Also see JP'175, page 527, compound (II), page 528, column 1, compound II-VI, and JP'072, page 567, column 1 and 2, compounds (1) to 3, page 568, column 1 and 2. The difference between the reference and herein claimed process appears to be the temperature range and may be amount of the reactants and catalyst.

It would have been prima facie obvious to one of ordinary skill in the art at the time the invention was made to use the process of JP'175 or JP'272, to make atenolol, by reacting a phenol with epichlorohydrin in the presence of alkali metal hydroxide and a quaternary ammonium salt as phase transfer catalyst, wherein an intermediate glycidyl ether is formed, which is then reacted with isopropylamine, because the prior art is expressly teaching all the steps and the process is analogous with any difference if at all is with respect to the temperature range and amount of the reactants, which can be worked out under routine experimentation, with the reasonable expectation of achieving a high yield of purified atenolol, absent evidence to the contrary.

No claim is allowed.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to SHAILENDRA - KUMAR whose telephone number is (571)272-0640. The examiner can normally be reached on Mon-Thur 8:00-5:30, Alt Fri.
